Credit(s) earned on completion of this course will be reported to **AIA CES** for AIA members.

Certificates of Completion for both AIA members and non-AIA members are available upon request.

This course is registered with **AIA CES** for continuing professional education. As such, it does not include content that may be deemed or construed to be an approval or endorsement by the AIA of any material of construction or any method or manner of handling, using, distributing, or dealing in any material or product.

Questions related to specific materials, methods, and services will be addressed at the conclusion of this presentation.

Course Description

Summit Panel Session - Products & Design Innovations

This session will feature a cross-section of promising ZNE-supportive products and technologies that have been included in recent ZNE projects, both residential and non-residential. The dialogue will be focused on the role of technologies in advancing the state of the art of ZNE building design. How essential are the technologies? How far can we go with off-the-shelf technologies? How much farther will emerging technologies enable us to go?

Learning Objectives

At the end of the this course, participants will be able to:

This concludes The American Institute of Architects
Continuing Education Systems Course
